

# THE AUDUBON SOCIETY OF CORVALLIS CHAT

OCTOBER 2016

VOL. 46 #2

## OCTOBER 2016 PROGRAM

Thursday, Oct. 20, 2016  
Chintimini Senior Center  
2601 NW Tyler Ave (& 27th) in Corvallis

### HISTORICAL DYNAMICS & PATTERNS OF COAST RANGE VEGETATION & IMPLICATIONS FOR MANAGING FOR BIRD HABITAT

The Oregon Coast Range has undergone enormous vegetation changes since the mid-19th century, mainly due to fire and logging. More recently, conservationists and timber companies have fought bitterly over the area. Dr. Tom Spies has been analyzing these events for many years over the course of his career. In his talk, he will explore what we know about the ecological history of forests of the Oregon Coast Range, how the landscapes of the Coast Range have changed over the last 100 years and what the implications are for bird habitat.

Tom is a Senior Scientist with the US Forest Service at the Pacific Northwest Research Station in Corvallis. He studies forest and landscape ecology, fire ecology, and effects of forest management on biodiversity, in particular old-growth forest ecology and conservation. He received his Ph.D. from the University of Michigan and is a native Michigander.

*Bill Proebsting, Vice Pres. & Program Chair,  
[proebstw@gmail.com](mailto:proebstw@gmail.com)*

**Social hour begins at 6:30, with the chapter meeting starting at 7:00 and the program starting about 7:30.**

### ALSO AT THE OCTOBER MEETING

The National Audubon Society has issued an urgent call to action urging members to work for solutions to climate change to prevent a major bird extinction crisis. At the start of the October meeting, I will provide a brief explanation of carbon fee and dividend, a simple nonpartisan proposal to price carbon and rapidly bring down fossil fuel emissions. I will also highlight recent progress in combating climate change and provide information on how to help, on behalf of birds and other living things.

*Carla Wise, co-leader, Corvallis Chapter of Citizens' Climate Lobby*

### NEXT MONTH'S ASC PROGRAMS:

**November 17:** Dr. Matt Betts, Department of Fish and Wildlife, OSU, "Do birds help trees grow in managed forests? Lessons from a long-term experiment in the Oregon Coast Range."

## ASC GENERAL MEETINGS

**THIRD THURSDAYS AT CHINTIMINI SENIOR CTR:**  
2601 NW Tyler Ave (& 27th) in Corvallis  
Next Meeting: Thursday, Oct. 20, 2016

## FIELD TRIP SCHEDULE

Local monthly field trips are held on second Saturdays. Meet at the Benton Center parking area, behind the Cannery Mall, 777 NW 9th St., Corvallis at 7:30 am. These field trips are free and geared towards beginning birders, birders new to Oregon's mid-valley area and persons looking for a pleasant outing. Contact Bill Proebsting at [proebstw@gmail.com](mailto:proebstw@gmail.com) or 541-752-0108 with questions. Check the Midvalley ListServ, <http://www.midvalleybirding.org/pipermail/birding/>, a couple of days before the field trip for updates. Weather may alter plans. Watch the weather forecast and dress appropriately. Return to Benton Center by noon.

*Bill Proebsting*

### NEXT LOCAL FIELD TRIP:

**October 8. Finley NWR.** We will proceed directly to the Finley Prairie Overlook and progress across the refuge on Finley Road, focusing on Cabell Marsh, Woodpecker Loop and the HQ area.

## TENTATIVE 2017 ASC WEEKEND FIELD TRIP SCHEDULE:

Bandon/ Port Orford, March 3-5  
Klamath Basin, March 31 - April 2  
Rogue Valley, April 28-30  
Malheur NWR, June 1-4  
Summer Lake, June 23-25  
Wallowas, July 20-23  
Steens, August 10-13  
South Coast, August 25-27

On these trips, we travel in rental vans, stay in motel-style accommodations, and eat meals wherever we can get them. We share all expenses. There will be signup sheets at the Field Trip table at the ASC general meetings starting in December of this year.

If there are parts of Oregon you want to add to the schedule, please consider organizing a tour. Assistance in the planning and execution is available.

*Fred Ramsey*

---

## PRESIDENT'S CORNER

### ASC WILL HOST OREGON AUDUBON COUNCIL FALL MEETING

The Oregon Audubon Council (OAC) consists of all Audubon Society chapters within the state of Oregon. OAC meets twice annually, in spring and fall. Last April OAC met in Bandon, where we were hosted by the Cape Arago Audubon Society. Recently ASC was invited to host the fall meeting, which will be held on Saturday, November 12. This presents a nice opportunity for us to showcase our programs (including Hesthavn) and birding opportunities in our vicinity. As I write this, we are in preliminary stages of planning the program, which will consist of group dinners Friday and Saturday, an all-day meeting on Saturday, and a Sunday morning field trip. Stay tuned for more information, and I hope that many ASC members will be able to participate.

*Chris Mathews, President, ASC*

---

## HESTHAVN NEWS

On Monday Sept 19 twelve OSU Honors College students came out to Hesthavn for a "Morning of Service." They cleaned out weeds from caged plants scattered throughout the property, a project that was badly needed. They did a nice job and a splendid time was had by all. I encouraged all students to connect with our partners at OSU Bird Nerds.

Please consider joining our volunteer work parties, which are noted on the ASC website. On October 15 we will focus on barn and yard maintenance and clean up between 10 am and 2 pm. Hope to see you there. Thanks.

*Ray Drapek, Hesthavn Chair*

*OSU Honors College students at Hesthavn for a "Morning of Service"*

## ATOP THE NESTBOX

The 2016 season was somewhat unusual. In general, the bluebirds began nesting a bit later than usual. Large numbers chose not to have second broods. In terms of the number fledged, those effects may have been offset by a larger number of nesting pairs. We will know more when the final data are in.

I want to thank those who conducted field surveys for the Climate Watch Protocol. There were no big surprises for us regarding the locations where bluebirds were and were not seen, but all of the information was valuable. During the debriefing, I learned that about 90 groups participated nationwide, with about a thousand 36-square mile grids covered. Please note that the next survey, either this winter or next spring, will include 4 species of nuthatches. Additional species will be added for each survey going forward. A chief criticism offered to the Climate Watch staff was that many chapters felt they had insufficient notice to recruit adequate numbers of volunteers. This will hopefully be rectified, so stay tuned!

*Raylene Gordin, Bluebird Trail Chair*

## FIELD NOTES

**08/24/16-09/20/16**

Hot, dry weather continued for the first three days of the period before giving way to foggy mornings with milder temperatures, with just one more day above 90 F in September. The first noticeable precipitation came as mist on 29 Aug, followed by scant but measurable showers on 1-2 Sep, and several honest-to-goodness rainy days in mid-Sep. The rain seemed to bring out more flying and crawling insects including termite flights by 17 Sep, helping to fuel southbound swallows and other insectivores.

**Abbreviations and locations:** NWR = National Wildlife Refuge, STP = sewage treatment ponds, WA = Wildlife Area. E.E. Wilson WA is north of Corvallis. Luckiamute State Natural Area is along the Willamette River northwest of Albany. Philomath STP is south of Philomath and requires access permission. Teloh-Calapooia Park is in south Albany near Linn-Benton Community College, Cabell Marsh, McFadden Marsh, and North Prairie are locations at Finley NWR.

### Observations

Southbound migration of **Greater White-fronted Geese** continued through the period. A flock passed over EE Wilson WA in the wee hours of 29 Aug. Two flocks flew over McDonald Forest 19 Sep (Pam & Randy Comeleo).

**Ducks** produced little excitement either on the gridiron or on local ponds, after the first representatives of most wintering species began to show up in the preceding

*Vaux's Swifts entering the chimney at OSU's Wiegand Hall during fall migration. Photo by Ian Bacon.*

period, but numbers (and football scores) remained low. Three **Ring-necked Ducks** were at the Philomath STP by 10 Sep (Hendrik Herlyn).

At least three lingering **Common Nighthawks** were over Dunn Forest 31 Aug (Pam and Randy Comeleo). One foraged high over south Corvallis 7 Sep (Nancy Baumeister) and again 14 Sep (Woody Fitzgerald).

Southbound migration of **Vaux's Swifts** was the main event of the season, as birders enjoyed the spectacle of hundreds and even thousands funneling downward into local chimneys. Due to loss of natural roosts in old-growth snags, these birds have come to depend on masonry chimneys along their migration routes. This month Wiegand Hall on the OSU campus hosted the largest numbers with 590 Vaux's Swifts on the evening of 24 Aug, increasing to 1100 on 29 Aug (Nancy Baumeister) and a peak count of 2500 on 3 Sep (Bev Clark, Mary Garrard), with at least 2000 still roosting there 11 Sep (Don Boucher, Lisa Millbank).

Nancy Baumeister and Mary Garrard also found **Vaux's Swifts** using another chimney on the south side of the Old World Deli in Corvallis, with 90 there 3 Sep and about 150 on 9 Sep.

*The chimney at OSU's Wiegand Hall had many migrating Vaux's Swifts roost in it during late August and early September*

The new swift tower in Albany's Swanson's Park, constructed to replace the old fire station chimney by ASC volunteers in cooperation with Larry Schwitters of [vauxhappening.org](http://vauxhappening.org) and the City of Albany, is still waiting for its first occupants. 15 Vaux's Swifts flew directly over "the Geoduck" (Larry's nickname for the new tower) but didn't go in 30 Aug (Will Wright). On 7 Sep volunteer watchers saw 30 swifts a few blocks away, but only a few swifts showed interest in the recorded calls that were being broadcast by an MP3 player and speaker at the chimney. On 13 Sep at least 170 flew into two brick chimneys six blocks away at 2nd and Broadalbin (Jim Fairchild). At least 250 foraged over the other (east) end of downtown Albany 18 Sep.

This month also produced a few reports of migrant **Black Swifts**, a larger and still largely mysterious species that nests behind mountain waterfalls. Three flew over the Philomath STP 31 Aug (Rich Hoyer, Isaac Denzer). Two were reported downstream of Peoria 5 Sep (Evan Smouse). One flew near the new swift tower in Albany 7 Sep (Karan & Jim Fairchild, Ray Drapek, Karin Lamberson).

**Rufous Hummingbirds** mostly left our area by the first week of September. Jeff Harding photographed a female north of Lebanon 4 Sep. One at Bill and Lena Proebsting's place on Oak Creek west of Corvallis stayed through 10 Sep.

At Ankeny NWR 4 Sep, a juvenile **Sora** bathed and foraged in a pond full of young **bullfrogs**; a young Virginia Rail also foraged in vegetation at the edge of the pond (Jessica Rondema).

An **American Avocet** in basic plumage was at Baskett Slough NWR 25 Aug through 5 Sep. On 31 Aug it sought shelter from the attention of a **Peregrine Falcon** and two **Bald Eagles** by landing and then sticking close to a feisty **Great Blue Heron** (Frank Kolwicz).

A **Baird's Sandpiper** foraged alongside many **Least Sandpipers** at Baskett Slough NWR 27 Aug (Frank Kolwicz; Glen Taylor). Southbound migration of other shorebirds continued in September, although numbers were generally modest and limited to a few artificial wetlands where water remained. Two **Spotted Sandpipers** were the only shorebirds evident at the Philomath STP 10 Sep (Hendrik Herlyn). A migrant **Solitary Sandpiper** stopped to forage at Lost Lake near Santiam Pass 10 Sep (Jay Withgott).

On 16 Sep the old Clemens Mill Pond in Philomath held a remarkable diversity of sandpiper species: two apiece of **Least** and **Pectoral Sandpipers**, plus one **Western Sandpiper**, one **Greater Yellowlegs**, and one **Lesser Yellowlegs**; eight **Wilson's Snipe** outnumbered the sandpipers (Hendrik Herlyn).

Three **gulls** that flew south over Peoria 31 Aug (Greg Metcalfe) were likely **California Gulls**, which migrate through our area on their way to the coast in late summer.

**American White Pelicans** turned up again at Cabell Marsh 28 Aug (Isaac Denzer, Kai Frueh). 42 **Great Egrets** at Cheadle Marsh 28 Aug (Isaac Denzer, Kai Frueh) were a significant concentration for the mid-Willamette Valley.

"Kettles" of southward migrating **Turkey Vultures** were a regular sight by mid-September.

Most **Osprey** left their nesting sites but a few continued to be seen. On 11 Sep Barbara Millikan saw one carrying a stick along the Willamette River near Salem. Nesting behavior at this point in the season may seem surprising, but University of Oregon ornithologist Dan Gleason notes that Osprey frequently engage in such behavior prior to migration: "It may be a way to reinforce the pair-bond and/or nest site fidelity prior to separating for the winter. However, males may continue this behavior even after the female has left."

A **White-tailed Kite** visiting the Philomath STP was mobbed by **Barn Swallows** 24 Aug (Cody Smith). On 10 Sep an immature **kite** was south of Kings Valley (Isaac Denzer), where this species has nested in past years.

An adult female **Northern Goshawk** was perched along the railroad grade north of Finley NWR 11 Sep; a male **Sharp-shinned Hawk** was also in the vicinity (Richard F. Hoyer). A **Red-shouldered Hawk** was seen during the ASC field trip to Bald Hill Natural Area 10 Sep (Bill Proebsting).

A **Barred Owl** called along the 720 Road in McDonald Forest 19 Sep (Pam & Randy Comeleo). **Great Horned Owls** resumed calling in September, as the first stage of their winter breeding season.

A migrant **Lewis's Woodpecker** sallied after flying insects along Starr Creek Rd. west of Finley NWR 9 Sep (Jacob Mathison). An immature bird stopped by Peoria 15 Sep (Greg Metcalfe). This species formerly nested in the Willamette Valley, but there have been no nesting records

since the 1970s. Their disappearance as a nesting species has been attributed to loss of oak/pine savanna habitat and competition with invasive **European Starlings** for cavities.

A **Downy Woodpecker** chipped out seeds from a sunflower head near Teloh-Calapooia Park 19-20 Sep (Jim Smith). A **Pileated Woodpecker** flew across Rock Creek during a Marys River Watershed Council tour 11 Sep (Rana Foster).

A **Olive-sided Flycatcher** turned up w. of Monmouth 26 Aug (Caleb Centanni). **Western Wood-Pewees** were still calling at Luckiamute SNA 26 Aug. A juvenile near E.E. Wilson WA 29 Aug was flycatching over a garden sprinkler. Several were still in Teloh-Calapooia Park 15 Sep (Jim Smith).

Jim Leonard photographed a silent "**Western**" **Flycatcher** (most likely a **Pacific-slope Flycatcher** by range) at Finley NWR 14 Sep. A **Black Phoebe** turned up on a farm s. of Monmouth 17 Sep (Mike Lippsmeyer), indicating local movement by this generally non-migratory species.

Four **Gray Jays** visited Randy and Pam Comeleo's water bath near Fitton Green Natural Area 3 Sep.

There were no Linn, Benton, or Polk County reports of **Horned Larks** during the period, either on the Mid-Valley birding list or on eBird. Normally flocks including juveniles of our endemic subspecies, "Streaked" Horned Lark (classed as Threatened under the Endangered Species Act) should be noticed in late summer. The population at Corvallis Airport, being monitored by OSU researchers, presumably continues but has declined significantly in recent years.

Two **Purple Martins** were still in Dunn Forest 31 Aug (Pam and Randy Comeleo). Large flocks of **Barn Swallows** were using cornfields near Dayton as nocturnal roosting sites by 10 Sep (Paul Sullivan).

**Golden-crowned Kinglets** turned up in Teloh-Calapooia Park 15 Sep (Jim Smith), signaling their return to lower elevations.

Migrant **Swainson's Thrushes** called after dropping down into bushes in NW Corvallis early on 24 Aug (Susan Hatlevig). On 28 Aug one blundered into Jim and Karan Fairchild's cellar southwest of Corvallis, but safely found its way out with some encouragement from Jim. Catherine Otto heard many migrating over NW Corvallis before sunrise 19 Sep.

A **Varied Thrush** calling at 750 ft elevation sw. of Philomath 5 Sep (Karan Fairchild) may have signaled the beginning of downslope movement for this species that nests in the Coast Range and Cascades.

**Cedar Waxwings** flocks continued through the end of the period, congregating around trees and shrubs with berries.

An early **American Pipit** was photographed at the Philomath STP 29 Aug (Isaac Denzer, Kai Frueh). A flock was seen there 31 Aug (Hendrik Herlyn).

**American Goldfinch** flocks were conspicuous during September, congregating to feed on seeds around weedy

*Cedar Waxwing photo by Matt Lee*

fields and edges.

**Common Yellowthroats** continued through the period, but numbers were thinning noticeably at E.E. Wilson WA by late September. A **Yellow Warbler** was still at Sarah Helmick State Park 5 Sep (Rich Hoyer). **Yellow-rumped Warblers** began to arrive at low elevations by 14 Sep when one was at Ankeny NWR (fide Mike Unger). **Black-throated Gray** and **Wilson's Warblers** were found during the ASC field trip to Bald Hill Natural Area 10 Sep (Bill Proebsting). Four migrant **Townsend's Warblers** showed up in McDonald Forest by 8 Sep, and another turned up in E.E. Wilson WA 13 Sep (Bill Proebsting).

A family group of **Chipping Sparrows** with three juveniles were at Luckiamute SNA where this species sometime nests 26 Aug. A **Lark Sparrow** visited the Philomath STP 10 Sep (Hendrik Herlyn).

The first fall arrival of a "**Sooty**" **Fox Sparrow** was noted 3 Sep on Witham Hill (Hendrik Herlyn). Three were SW of Philomath 5 Sep (Karan Fairchild). Two very recently fledged **Song Sparrows** and at least five migrant **Lincoln's Sparrows** were in the south end of E.E. Wilson WA by 15 Sep.

## MEMBERSHIP CORNER

WELCOME NEW MEMBERS!

Kerry Glauser  
Chris Shank  
Maurice Woods

## MEMBERSHIP RENEWAL

To renew your membership online go to: <http://www.audubon.corvallis.or.us/join.shtml> & renew via Paypal, or you can mail a check to: ASC, PO Box 148, Corvallis, OR 97339.

## EMAIL NOTIFICATIONS:

Please note that you need to opt into the ASC listserv. After you sign up, you'll receive up-to-date email notifications about ASC events, fieldtrip locations, volunteer work parties and weather-related cancellations. Send an email to our listserv administrator, Karan Fairchild, and request to be added to the listserv: [alderspr@peak.org](mailto:alderspr@peak.org)

## HAVE YOU CHANGED YOUR CONTACT INFORMATION?

If you have moved or changed your email address, send your new contact information to Suzanne Ortiz at [ortizsv@gmail.com](mailto:ortizsv@gmail.com).

*Suzanne Ortiz, ASC Membership Chair*

## CONTRIBUTORS TO THIS CHAT

Bill Proebsting, Chris Mathews, Ray Drapek, Raylene Gordin, Carla Wise, Joel Geier, Gail Nickerson, Suzanne Ortiz, Steve Holmer, Joe Liebezeit and Don Boucher

*Golden-crowned Sparrow photo by Matt Lee*

**Golden-crowned Sparrows** began to arrive 9 Sep when Scott Priebe found one at Ankeny NWR and Bill Proebsting found another at Bald Hill. At least 15 were in the south end of E.E. Wilson WA by 15 Sep.

Two female **Western Tanagers** bickered near EE Wilson 27 Aug, and one was still around 29 Aug. Fallouts of multiple birds were noted near E.E. Wilson WA (personal observation) and in Soap Creek Valley (Doug Bilsland) on the morning of 17 Sep.

A few female **Black-headed Grosbeaks** continued near EE Wilson WA at least through 29 Aug. A very late immature bird was near Ankeny NWR 18 Sep (Charlotte Hottmann). A late female or immature **Lazuli Bunting** was near EE Wilson WA 29 Aug.

A female or immature **Bobolink** turned up at the Philomath STP 15 Sep (Russ Namitz; Rich Hoyer) and was seen through 19 Sep (Tom Love).

A **Red-legged Frog** hopped out onto a trail at Teloh- Calapooia Park 19 Sep (Jim Smith). On 26 Aug Carol Hiler saw a very small spotted **Black-tailed Deer** fawn with its mother in North Albany.

A **Gray Hairstreak** butterfly found meadow checkermallow in Jim Smith's nature-scaped yard near Teloh-Calapooia, then laid eggs that yielded at least one stout caterpillar. A **Monarch** butterfly that Molly Monroe, Jarod Jebousek and their daughter Amelia raised from caterpillar stage, then tagged and released on 30 Aug as part of a migration project, was spotted and recorded on video in San Francisco 18 Sep.

**Next month:** The remaining swallows, vultures, warblers, and tanagers will mostly head south, giving way to wintering raptors and sparrows. Please post your observations to the Mid-Valley birding list at [midvalleybirding.org](http://midvalleybirding.org), e-mail them to me at [joel.geier@peak.org](mailto:joel.geier@peak.org), send by post to 38566 Hwy 99W Corvallis 97330, or call (541) 745-5821 by 25 Oct.

## COMMUNITY NOTES

### AS CONGRESS RESUMES, MIGRATORY BIRD FUNDING AND ESA EXEMPTIONS ARE AT STAKE

Right now, the U.S. Congress is working to put together a bill to fund the government for Fiscal Year 2017. Congress has an opportunity to boost much-needed funding levels for bird conservation programs as a result of the budget compromise last fall. Conservation-minded lawmakers also need to keep anti-environment amendments out of the bill. One of the “riders” in this year’s spending bill prohibits funding Endangered Species Act protections for the Greater Sage-Grouse. This rider needs to be kept out of this year’s bill.

Essential programs like the Neotropical Migratory Bird Conservation Act and the Migratory Bird Joint Ventures impact many of the birds we see in our backyards each spring. These birds make epic journeys, play essential roles in our ecosystems, and provide pleasure to millions of people, but habitat loss and other threats are making their future less than certain. These conservation programs are essential today. Please ask your Senators and Representative to make protecting birds and wildlife a priority.

*Steve Holmer, American Bird Conservancy*

---

### CITIZEN SCIENCE PROJECT SEEKS VOLUNTEERS

The west coast Audubon network, U.S. Fish and Wildlife Service, and eBird are partnering on a citizen science project conducting bi-annual Brown Pelican surveys. This fall the count will be on October 15 at sites along Oregon’s coast. We ask volunteer to conduct the count for at least 1 hour during a 4-hour window ending at civil twilight that day.

We have targeted 17 sites along Oregon’s coast but volunteers can choose their own survey sites as well. To learn more about this opportunity, visit: <http://ca.audubon.org/brownpelicansurvey>. This website includes an easy protocol to follow, preliminary results from the Spring 2016 count, as well as instructional information on how to enter the survey data directly into eBird.

Data is being used to help better understand distribution and abundance of Brown Pelicans and track shifts in population structure.

To confirm your interest in participating & to figure out a site that works for you, please contact Joe Liebezeit at Audubon Society of Portland ([jliebezeit@audubonportland.org](mailto:jliebezeit@audubonportland.org); 971-222-6121).

*Joe Liebezeit, Audubon Society of Portland*

## BOARD MEETING SUMMARY

### SEPT 8, 2016 ASC BOARD MEETING

Vice President Bill Proebsting presided over the board meeting in the absence of Chris Mathews. Bill reported that the schedule for speakers is complete for the 2016-17 year and he welcomes suggestions for next year. Jim Fairchild reported on tower for migrating swifts. The board voted to get 5000 copies each of two brochures: 1) Audubon Society of Corvallis and 2) Birding the Corvallis and Albany areas. The next board meeting will be October 13th at 7 pm at Hesthavn Nature Center.

*Gail Nickerson, Secretary*

---

### OPEN BOARD MEETINGS

ASC Board of Directors meetings are open to all ASC members, and the board encourages you to come and see what we do. Our monthly board meeting is on Thursday one week before the General Meeting. See the calendar on the last page of The Chat for meeting location.

---

### CHAT ARTICLES

The Chat editors welcome articles from all members of the Audubon Society of Corvallis. Please submit articles to the Chat editor by the final Thursday of the month. Submit text using Microsoft Word and photos to: [chateditors@gmail.com](mailto:chateditors@gmail.com)

**AUDUBON SOCIETY OF  
CORVALLIS**

## CALENDAR

Oct 8	Half Day Field Trip to Finley NWR
Oct 13	ASC Board Meeting, 7 pm, Hesthavn
Oct 20	ASC General Meeting at Chintimini Senior Center
Oct 25	November CHAT submissions due
Nov 12	Half Day Field Trip, location TBA

The Chat is published 10 times a year by the Audubon Society of Corvallis, PO Box 148, Corvallis OR 97339. Annual ASC memberships are \$25 for an individual; \$35 for a family; \$15 for student; \$15 for Chat-only subscriptions (email delivery only); \$50 for Supporting Level; \$150 for Patron Level; and \$250 for Benefactor Level.
