

2023 Corvallis CBC Feeder Tally Form
Count Day: Tuesday, December 19, 2023

Name _____ Address _____

Phone Number _____ Email _____

Number of observers _____ Total observing time, to the nearest ¼ hour: _____

Instructions: Record the number of each species you observe at your feeders, in your yard, and in the air above your yard on the Count Day only. For each species, record only the greatest number of individual birds seen at one time; do not tally all birds seen during the day as that is likely to result in counting the same birds multiple times. If you observe a species not listed below, please add it at the end of the list. If you see any unusual birds at your feeders or in your yard 3 days before or 3 days after the Count Day that you don't see on the Count Day, please make a note on the back of this form, but do not include them in your Count Day total. If you have any questions, contact Bev Clark, clark.bev9@gmail.com; 541-231-7201.

Please send your form within one week after the Count Day to: **Bev Clark, 4925 SW Dresden Ave, Corvallis OR 97333.**
Thanks for participating!
